3] C4S: GENERAL EDUCATION STUDENTS

Documentation of service delivery for general education students who have a parent signed consent to treat, 504 plan or Plan of Care, and a physical therapy prescription. If a student is Medicaid eligible, and a prescription is on file, services can be billed. Proposed roll out for general education physical therapy services in the future.

GENERAL SERVICE INFORMATION

- Consult services are an integral part or an extension of a direct medical service but are not separately reimbursable.
- Service entry is due within TEN days of service delivery.
- Provider Notes must include enough detail to allow reconstruction of what transpired for each service. SOAP is best practice.
- Therapy/Treatment are reportable only if the student’s IEP/IFSP includes Direct services with a time and frequency.

Service Documentation:

The Michigan Department of Health & Human Services (MDHHS) has emphasized the importance of thoroughly documenting all services provided to Special Education students. For direct services such as therapy, documentation must include a progress entry for each direct service describing the service rendered and the student’s response to that day’s service or treatment. S.O.A.P. notes are best practice! If not using the S.O.A.P. format be sure enough data is in your provider notes to support the service you are entering. There must be enough data for an auditor to “recreate” the service. Your documentation must indicate not only WHAT services are being rendered to meet the student’s IEP/IFSP goals, but also HOW the student responded to service. **Provider Note Example:** Individual Therapy (97110 GP 96): “Dan was positioned while wearing bilateral DAFOs in a supine stander at 80 degrees for upright weight bearing and hamstring stretching. Tolerated 30 minutes without complaints of discomfort.”

Monthly Progress Summaries are REQUIRED for each month that services are reported for Medicaid eligible students. A monthly progress summary summarizes all services provided to the student throughout a month.

Monthly Progress Summary Example: “Dan was able to tolerate positioning in weight bearing and non-weight bearing positions without discomfort. The use of myofascial techniques prior to positioning improves tolerance. Improving with mobility on even and uneven surfaces. Able to climb stairs with handrail using a step to pattern without handheld assist.”

Annual Requirements:

Physical therapy services must be prescribed by a physician and updated annually.

Staff Qualifications:

The services listed are reimbursable when provided by a Physical Therapist Assistant currently licensed in Michigan. Physical Therapist Assistants must be under the direction of a fully licensed Physical Therapist.

Supervision & Under the Direction Of:

Michigan Department of Health and Human Services Provider Manual dated October 2019

1.4 UNDER THE DIRECTION OF

Certain specified services may be provided under the direction of or under the supervision of another clinician. For the supervising clinician, "under the direction of" means that the clinician is supervising the individual's care, which at a minimum, includes seeing the individual initially, prescribing the type of care to be provided, reviewing the need for continued services throughout treatment, assuring professional responsibility for services provided, and ensuring that all services are medically necessary. "Under the direction of" requires face-to-face contact by the clinician at least at the beginning of treatment and periodically thereafter.
